PROJECTS

Quotes Collector, *Full Stack Developer* - React | Node | Express | MongoDB | [GitHub](#) | [Website](#) 2022

- Built a fully-responsive app where users can create, review, update, delete, like, and share quotes
- Used Bootstrap with Axios to support CRUD functionality, React Router Dom for SPA, and Context API for State Management
- Implemented user registration and login features with JWTs to ensure verified user access to application
- Created MongoDB and connected to frontend components with Node and Express

Keep Notes, *Front End Developer* - React | React Router Dom | Bootstrap | CSS | [GitHub](#) | [Website](#) 2022

- Created an intuitive React app where the users can quickly save and search notes by title name
- Built several customizable functionalities using React-Router Dom and Bootstrap to support saving notes to localStorage with input validation
- Utilized CSS to offer users dark Mode options, easy navigation to search, and launched with Vercel

Historical Events, *Front End Developer* - React | Axios | CSS | [GitHub](#) | [Website](#) 2022

- Developed interactive React app where users can choose from several options to identify important events by date
- With a simple click, users can choose between yesterday, today, or tomorrow for easy search experience
- Integrated calendar and search selection components with CSS and populated historical events using RESTful API
